## Environmental Policy Statement

### Objectives

As part of our commitment to achieving the principles of responsible Environmental Management, sustainability and protection of the natural environment in our workplace, we recognise our moral and legal responsibility to ensure that our activities, products and services are designed to protect and enhance the environment in the communities in which we operate, and our obligations to ensuring that our operations do not place the natural environment or the local community at risk of harm.

Lucy Commercial Projects recognises its responsibilities of Environmental Management.

### Strategies

Lucy Commercial Projects is committed to environmental improvement and prevention of pollution. We will achieve this by working with our contractors, suppliers, workers and the community to adopt procedures that:

- Reduce waste through innovative work practices and recycling practices;
- Minimise environmental impacts by reduction of polluting substances produced by our operations, activities, products or services;
- Minimise the impact of our operations on the neighbouring community;
- Increase the use of environmentally acceptable materials, equipment and technology in place of those which are considered harmful;
- Ensure that our suppliers follow acceptable environmental policies;
- Actively promote environmental awareness among contractors, workers, and clients;
- Support continued improvement aimed at the elimination of waste, pollution and environmental harm, minimising use of water, energy, waste to landfill, and the use of transportation;
- Encourage consultation and co-operation between Management, Workers and Stakeholders in matters which may affect or impact on the environment; and
- Provide adequate resources to meet these environmental commitments.
